

WEATHER

THE GREAT EQUALIZER:

As we travel from event to event no matter how big or small, one thing that no one can control is the weather. Weather has a direct impact on the success of all outdoor and indoor motorcycle events. Three of the last events we did are case and point. The Strip Club Choppers Roadhouse was booked in Davenport Iowa for Sturgis on the River, Oklahoma Bike Week in Sparks Oklahoma and our first NASCAR event, the Coke Zero 400 in Daytona Florida. All had vastly different weather.

Sturgis on the River has had a reputation for tumultuous weather and this year didn't disappoint. In the past for this event has had floods and severe thunderstorm, this year tornado sirens bleared for two days. Fortunately for everyone involved Glen, Jessica and the rest of the staff are weather crisis veterans and handled the situation professionally. Next stop was Sparks Oklahoma and the weather there was a blistering ninety-five degrees and sunny. Not quite the crises of a tornado but heat can take its toll

on you after a few days, however the promoters Tony, Amanda and their staff supplied more ice and cold water than Canada in a snowstorm. This kept us and kept our VIP tent patrons very happy. Last but certainly not least was the Coke 400 in Daytona our first NASCAR event, unfortunately it was a wash out, and the race was postponed. Needless to say it was not very good for sales. The moral to this road story is; promoters who are professional and prepared for any situation can turn a potential disaster into a great time. Extreme weather or not our sub culture is all about pulling together and helping each other weather the storm...no pun intended. Catch us this month in Sturgis at the Monkey Rock where top-headlining artists like Creed will be performing. For more info visit us at stripclubchoppers.com and check us out on the Discovery network's HD Theater on Two Wheel Thunder.
