

Daytona or Bust.

When we were making our plans for this year Daytona bike week one of the highlights was an eight hundred mile bike ride from our friends Ricky Kelley's dealership, Harley-Davidson of Columbia Tennessee to our Strip Club Choppers Roadhouse at the Hang Dawg saloon vending area. The trip started off on a grey day with temperatures only topping twenty-eight degrees, yes twenty-eight degrees. Joining the ride were Beanner, Sasha Mullens Country super star James Otto, Cory Gearman, James'

manager Lonny Spiva fro Heartland USA, Bruce and Mark Martin from American Custom and Cory Ness. On the first leg to Atlanta the temperatures hovered around thirty degrees but that night all felt a sense of accomplishment and we retired early, three hundred miles in the freezing cold takes a bit of energy out of you. The next morning we woke to four inches of snow in blizzard like conditions. Yes we saddled up and rode another two hundred miles. Props to Sasha Mullens for riding her chopped Sportser with all of us on baggers and staying in front of the pack, at 5'2" Sasha is power house on two wheels.

The final leg of the ride was from Derek Kelley's Harley-Davidson of Ocala dealership where approximately fifty others riders joined in for the chilly ride to the Strip Club Choppers Roadhouse. The entire ride was filmed for */Two Wheel Thunder/* on the Discovery Channel's HD Theater. The glamorous world of TV...NOT!

Daytona Bike week was one of the coldest in many years but despite the weather we all made friends that will last a life time and partied for several days straight. If you love the biker lifestyle there is nothing that will hold you back from getting ion the road with friends, we'll maybe the snow was a bit much.
