

STRIP CLUB CHOPPERS

ROADHOUSE

We are all feeling the effects of a struggling economy and the motorcycle industry has been hit hard, however what many forget is that being part of this culture is free!

Several years ago when Strip Club Choppers was founded by Johnny Lange, his intentions were never to build and sell custom bikes and he doesn't. The whole purpose of the company was to have fun. If you ask him directly he'll tell you straight up that he started Strip Club Choppers so he could be around motorcycles, friends, girls and justify doing market research at strip clubs. The fact of the matter is that Johnny has been part of the motorcycle scene for many many years and has seen it all. Jumping on and off the latest trends is simply NOT what he's all about.

Over the years his business has grown, but unlike many, Johnny has dumped almost all of his profits into expanding the business, OK so maybe a few bucks ended up in a G-string or two. The main difference between Strip Club Choppers and other custom bike manufacturers or apparel companies is that they

focus their resources into creating a cool vibe at events and rallies for everyone.

The traveling roadhouse is designed to invite people to come and hang out. All are welcome to kick back and check out pretty girls on dance poles, sit around at the custom bar tables and get comfortable in leather chairs and couches, of course there's also a kick ass 2000 watt sound system pumping continuous music. The whole set up is an experience not just a vending booth. The area would not be complete without Johnny's signature choppers, which includes the world famous, and one of the most photographed motorcycles, the "Strip Pole" bike! This bike gets so much attention that it has been featured on Jay Leno's "The Tonight Show," ESPN2, Speed Channel's "American Thunder," Street Chopper, EasyRiders, Born to Ride, and numerous other television shows and magazines.

The energy and atmosphere is something that every one should stop by and enjoy regardless of their budget. Also his long time friend Jay Barbieri, the producer and on air personality of Speed Channel's long-running motorcycle show "American Thunder" and author of best selling book

"Biker's Handbook", is usually on hand to meet people answer questions and, if really encouraged, just kidding he's a ham, sign an autograph and take a picture or two. When you've had enough of the guys, and that could be quick with these two characters, Johnny keeps his secret weapon near by, Debbi Davids, who is sure to appeal to even the most cynical biker. Debbie is the super HOT "Miss STRIP CLUB CHOPPERS" who has appeared in 8 issues of Playboy.

Oh yeah and don't worry about trying to find these guys at local events the Roadhouse tour now includes a vending only rig too fill in the gaps during the rally season. And not to leave out their brothers from the great north there's a brand new Strip Club Choppers of Canada on the road.

So, when your at a rally and feeling a little bit down and out about the current economic climate stop by the Strip Club Chopper's Roadhouse, it's a guaranteed morale booster if ya know what I mean.

Please visit SCC at Daytona Bike week on Beach Street. Your also invited to celebrate their 5th anniversary at the Grand opening of Diamond Dolls gentlemen's club at 642 N Ridgewood Ave, Daytona Beach, on Thursday March 5th from 8 PM until when ever. Anyone wearing SCC apparel gets in free.
